

## About Dr.Backup

Founded in 2001, Doctor Backup, LLC (**Dr.Backup**) is a privately held, owner-operated company headquartered just a few miles from our nation's capital, Washington DC.

We are specialists in providing managed [online backup](#) service to small-mid sized businesses. We help our clients safeguard one of their most critical business assets - their computer data.

**Dr.Backup** owns and operates its own backup servers and storage network. This enables us to provide clients with both high levels of reliability and exceptional value. Each month we perform over 85,000 fully-managed [S.M.A.R.T.](#) online backups - which combine superior online backup technology with *ongoing* expert service from our technical team.

Over the years, we have assisted in the successful restoration of millions of files from our [secure storage](#) archives - allowing our business clients to avoid the extreme hardship and financial impact that comes with data loss.

**Dr.Backup** services clients from virtually all industry segments, from accountants to non-profit organizations. Our service is widely used in doctor's offices - helping medical professionals achieve [HIPAA compliance](#).

We are the preferred online backup solution provider for 100s of technology professionals nationwide who have joined our [Pro-Partner Program](#). They include **Dr.Backup** in the comprehensive managed care solutions they deliver to their own clients - ensuring them the highest levels of data protection and customer care.

Our clients and Pro-Partners enjoy some of the highest levels of customer support in the industry. We take our service motto, "**We've Got Your Back**," very seriously, and stand behind our offerings with one of the industry's only 100% Customer Satisfaction guarantees.
